

TRIP UNIT SETTINGS LOCK OUT ASSEMBLY

ABSTRACT OF THE DISCLOSURE

A circuit breaker (10) having a trip unit (24) includes a lock out assembly (42) positioned adjacent the trip unit (24) for controlling access thereto. The lock out assembly (42) includes a base member (44), a cover member (48) and a slide member (46) received therebetween. The slide member (46) is moveable between various positions for controlling access to settings (32) for the various operating parameters of the circuit breaker (10) as provided by the trip unit (24).
