(54) Title: CATALYST AND PROCESS FOR THE PREPARATION OF VINYL ACETATE

(54) Bezeichnung: KATALYSATOR UND VERFAHREN ZUR HERSTELLUNG VON VINYLACETAT

(57) Abstract

The invention relates to a process for the preparation of vinyl acetate in a gaseous phase from ethylene, acetic acid and oxygen or gases containing oxygen while simultaneously forming low levels of high-boiling agents on a catalyst which contains palladium and/ or the compounds thereof, gold and/or the compounds thereof and alkali metal compounds on a carrier. The process is characterised in that the catalyst also contains boron or boron compounds.

(57) Zusammenfassung

Verfahren zur Herstellung von Vinylacetat in der Gasphase aus Ethylen, Essigsäure und Sauerstoff oder Sauerstoff enthaltenden Gasen bei gleichzeitig geringer Hochsiederbildung an einem Katalysator, der Palladium und/oder dessen Verbindungen, Gold und/oder dessen Verbindungen sowie Alkalimetallverbindungen auf einem Träger enthält, dadurch gekennzeichnet, daß der Katalysator zusätzlich Bor oder Borverbindungen enthält.
