(54) Title: ENCLOSURE SYSTEM FOR PRESSURE RELIEF DEVICE

(57) Abstract: An enclosure (10) for a pressure relief device (12) mounted on electrical equipment housings (6), is pre-assembled together with the pressure relief device (12). The enclosure (10), which provides for temporarily confining and directing fluids discharged from the pressure relief device (12), is pre-assembled leaving a clearance space (H) so that the pressure relief device (12) can be mounted on the housing (6) with the enclosure system in place. A peripheral shield (70) with an opening (80) for attaching the enclosure (10) to a discharge pipe or other duct work remains rotatable until deliberately secured in place. Components can be shared between the enclosure (10) and the pressure relief device (12) to provide a more efficient and cost effective design.
