6. The composition according to any one of claims 1 to 5, wherein the non-surfactant electrolyte is sodium sulfate.

7. The composition according to any one of claims 1 to 6, wherein the non-surfactant electrolyte is present at a concentration of from about 1 to about 5% by weight of the composition.

8. The composition according to any one of claims 1 to 7, wherein the non-surfactant electrolyte is present at a concentration of about 2% by weight of the composition.

9. The composition according to any one of claims 1 to 8, wherein the composition is in a form selected from: a mouthrinse, toothpaste, a lozenge, a confectionary, and a dissolvable tablet.

10. The composition according to any one of claims 1 to 9, further comprising one or more components selected from: a fluoride ion source, an abrasive, a surfactant, a foaming agent, a vitamin, a polymer, an enzyme, a humectant, a thickener, an antibacterial agent, a preservative, a flavoring agent and a colorant.

11. The composition according to any one of claims 1 to 10, wherein at least one of the one or more components is a fluoride ion source selected from: stannous fluoride, sodium fluoride, potassium fluoride, sodium monofluorophosphate, sodium fluorosilicate, ammonium fluorosilicate, amine fluoride, ammonium fluoride, and a combination of two or more thereof.

12. Use of a composition of any one of claims 1 to 11 in the manufacture of a medicament for treating a disease or condition of the oral cavity.

13. The use of claim 12, wherein the disease or condition of the oral cavity is selected from gingivitis, periodontitis and halitosis.

14. A composition according to any of claims 1 to 11 for use in the treatment of a disease or condition of the oral cavity wherein said method comprises contacting an oral cavity surface with the composition.

15. A composition according o any of claims 1 to 11 for use in the treatment of a disease or condition of the oral cavity selected from gingivitis, periodontitis and halitosis wherein said method comprises contacting an oral cavity surface with the composition.

REPLACEMENT SHEET Attorney Docket No: 9045-00-WO-OC

6. The composition according to any one of claims 1 to 5, wherein the non-surfactant electrolyte is sodium sulfate.

7. The composition according to any one of claims 1 to 6, wherein the non-surfactant electrolyte is present at a concentration of from about 1 to about 5% by weight of the composition.

8. The composition according to any one of claims 1 to 7, wherein the non-surfactant electrolyte is present at a concentration of about 2% by weight of the composition.

9. The composition according to any one of claims 1 to 8, wherein the composition is in a form selected from: a mouthrinse, toothpaste, a lozenge, a confectionary, and a dissolvable tablet.

10. The composition according to any one of claims 1 to 9, further comprising one or more components selected from: a fluoride ion source, an abrasive, a surfactant, a foaming agent, a vitamin, a polymer, an enzyme, a humectant, a thickener, an antibacterial agent, a preservative, a flavoring agent and a colorant.

11. The composition according to any one of claims 1 to 10, wherein at least one of the one or more components is a fluoride ion source selected from: stannous fluoride, sodium fluoride, potassium fluoride, sodium monofluorophosphate, sodium fluorosilicate, ammonium fluorosilicate, amine fluoride, ammonium fluoride, and a combination of two or more thereof.

12. A method of treating a disease or condition of the oral cavity comprising contacting an oral cavity surface with a composition of any one of claims 1 to 11.
