(54) Title: CROSS AND POST ORDER

(57) Abstract: A cross and post order and related market center and process are disclosed which automatically convert any unfilled balance of a cross order that was broken up due to interaction with the posting market center's order book to a limit order at the same price. The process also automatically associates the transactions that are used to fill the generated limit order with the cross and post order that was originally sent to the posting market center for execution.
