

[ABSTRACT]

MARINE VESSEL MANUFACTURING METHOD

5 A marine vessel manufacturing method includes: a step of removing an
intermediate hull portion (5C) that includes some tanks (3) and part of a hull (2) in a fore
and aft direction (Da) in which the some tanks (3) are provided, from an existing marine
vessel (1) including the hull (2) where a plurality of tanks (3) are arranged in the fore and
aft direction (Da); and a step of joining a bow-side hull portion (5A) disposed closer to a
10 bow (2a) than the intermediate hull portion (5C) to a stern-side hull portion (5B)
disposed closer to a stern (2r) than the intermediate hull portion (5C).
