

ABSTRACT

IMPRINT MATERIAL

There is provided a novel imprint material.

An imprint material comprising the following components (A), (B), and (C):

- 5 Component (A): a compound of the following formula (1):

(wherein two Rs are each independently a hydrogen atom or a methyl group),

- Component (B): a compound having a linear alkylene group having a carbon atom number of 6 to 10 and/or an alicyclic structure selected from the group consisting of a
- 10 cyclopentane structure, a cyclohexane structure, a norbornane structure, an isobornyl structure, and an adamantane structure, and at least one polymerizable group, and
- Component (C): a photopolymerization initiator.
