HANGER LANDING PIN INDICATOR

ABSTRACT

A system includes an annular wellhead housing (22) and an indicator assembly (100). The annular wellhead housing (22) includes a shoulder (32) and a first passage (102) extending radially through the wellhead housing (22) from an exterior surface of the wellhead housing (22) to an interior surface of the wellhead housing (22). The indicator assembly (100) is configured to extend through the passage (102), wherein the indicator assembly (100), when actuated, is configured to indicate whether a hanger (26) disposed within the wellhead housing (22) has landed on the shoulder (32).
