ABSTRACT

WATERPROOF AND ENVIRONMENTAL FRIENDLY PALLET WITH AN ENCLOSED BOX COLUMN AND FRAME STRUCTURE

This invention brings to the attention of the public a type of waterproof and environmental friendly pallet with an enclosed box column and frame structure, consisting of a panel (10) and a plurality of legs (20), and also a reinforcing frame (30). The said plurality of legs (30) are installed between the panel (10) and reinforcing frame (30). The said reinforcing frame (30) is a framework made of corrugated paperboard folded and packed together. The installation of reinforcing frame (30) in this invention improves the integrated firmness between the legs (20), thus enhancing the overall strength of the pallet.
