(54) Title: POWERED BREAST PUMP

(57) Abstract: Powered Breast Pump A powered breast pump has user input means (43, 44) which enable a user to control the pump in a "learn" mode. When the pump is switched to a "run" mode, it mimics the pumping cycle established by the user in the "learn" mode. The pump may be continuously operated in "learn" mode, in which case it functions as a power-assisted breast pump.
