(54) Title: ASSEMBLY COMPRISING AT LEAST ONE SUPPORT WITH DEPOSIT OF GETTER MATERIAL FOR USE IN ELECTROLUMINESCENT ORGANIC SCREENS

(57) Abstract: An assembly (10; 20; 30) is described, formed of at least one support (11; 21; 31) with a deposit (13; 22; 33) of a getter material, to be used as back support of electroluminescent organic screens (known as OLEDs); the assembly provides provisional protection from atmospheric gases for the getter deposit until it is used in the screen, and from the assembly is easily obtained a back support for OLEDs already comprising the getter deposit at the moment of use in the manufacture of these screens.
