(54) Title: A DEVICE FOR IDENTIFYING A PERSON AND A METHOD THEREOF

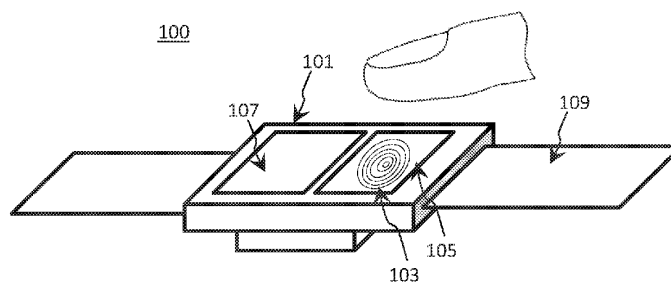

Figure 3

(57) Abstract: A device having a fingerprint reader and a first heart rate monitor which are co-located such that a person's heart rate is obtained at the same time as this fingerprint. The device is integral to yet another heart rate monitor for monitoring the performance of the person in exercise. The readings of the other heart rate monitor correlates to the readings of the first heart rate monitor if the person whose fingerprint is read is the same person wearing the second heart rate monitor, in which case the fingerprint is deemed acceptable for identifying the person. Other biometric identification besides fingerprint can be used such as iris recognition.
