

ABSTRACT

PHOTOCURABLE RESIN COMPOSITION FOR NAIL OR ARTIFICIAL NAIL

5 A photocurable resin composition for a nail or an
artificial nail of the present invention includes the
following components (A) to (C): component (A): a compound
having a (meth)acryloyl group; component (B): a
photoinitiator; and component (C): (meth)acrylic polymer
10 particles having an average particle size of 3 to 21 μm .
According to the present invention, a photocurable resin
composition for a nail or an artificial nail, which has
excellent transparency and workability and is capable of
forming a matte coat is provided.
