[0054]

Furthermore, even if information service based on a new technology is added, it is not necessary to exchange the on-board unit 1 itself by preparing an information device 100 corresponding to the new technology. As an example, a case in which the information service for displaying three-dimensional video is newly started is considered. Even in this case, it is not necessary to wait for sales start of a new on-board unit that corresponds to the three-dimensional video or replace the on-board unit by such a new on-board unit. The user can view the three-dimensional video by forwarding the information service data DAT to a personal computer corresponding to the three-dimensional video.

[0055]

As mentioned above, some embodiments of the present invention have been described with reference to the accompanying drawings. However, the present invention is not limited to the above-mentioned embodiments and can be modified without departing from the spirit or scope of the general inventive concept of the present invention.

[0056]

This application claims a priority based on Japan Patent Application No. JP 2013-013664, the disclosure of which is hereby incorporated by reference herein in its entirety.
