

ABSTRACT

VEHICLE WHEEL, RUNNING WHEEL, VEHICLE AND METHOD OF
ASSEMBLING AND DISASSEMBLING VEHICLE WHEEL

5 A vehicle wheel, which is divided in an axial direction of a tire into two pieces
which are an in-side half wheel (10) and an out-side half wheel (20) that are connected to
each other and fixed to an axle hub, includes wheel coupling bolts (7) joining a mating
surface (10a) of the in-side half wheel (10) and a mating surface (20a) of the out-side half
wheel (20) together, and hub bolts (8) joining the out-side half wheel (20) and the axle
10 hub (4) together. The wheel coupling bolts (7) and the hub bolts (8) are respectively
screwed into nuts (9A, 9B) from the out-side half wheel (20) side.
