

METHODS FOR MODULATING EICOSANOID METABOLISM

Abstract

5 The inventive subject matter relates to methods for
modulating an eicosanoid metabolic process in cells of
an animal in need thereof, which comprises administering
to the animal an amount of the inventive compositions
effective for regulating the activity of an eicosanoid
10 oxygenase. In particular, the inventive subject matter
relates to methods for modulating arachadonic acid
metabolism by administering an amount of the inventive
compositions effective for regulating the activity of
lipxygenases and cyclooxygenases.
