(54) Title: ELECTRONIC TABLE GAME WITH SUB-GAMES AND ADJUSTABLE PLAY SPEED

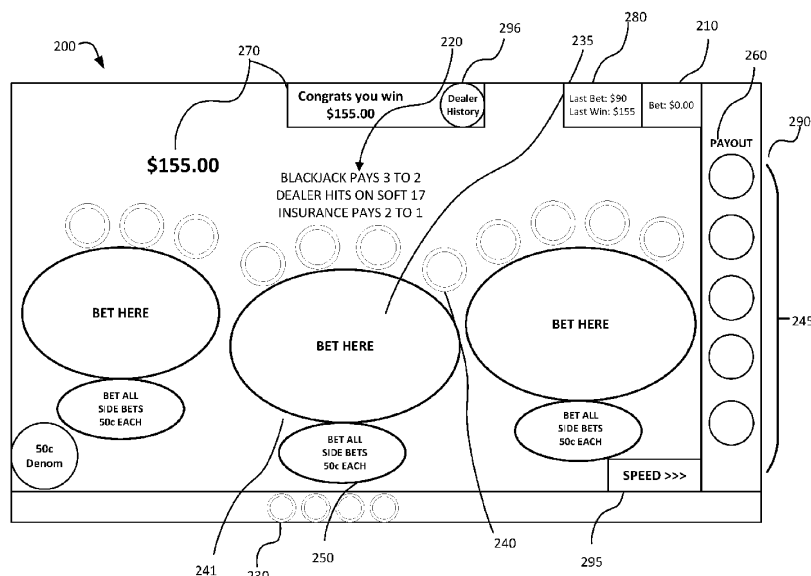

FIG. 2

(57) Abstract: The present disclosure relates to systems and methods for live game and video stream switching. Various embodiments may receive a credit selection to initiate a first credit amount on a first round of a blackjack game event. A graphical user interface may provide a virtual play area and a plurality of sub-game icons associated with the blackjack game event. A decision cycle time may be set for a duration of the game event. The decision cycle time defines a time window for making a game decision during a round of the blackjack game event. In some examples, a second decision cycle time may be set to define a time window for playing between rounds of the blackjack game event.
