ABSTRACT OF THE DISCLOSURE

Procedure for playing a 'Live-Casino' game of chance, playing cards tableau and gaming-cloth

The invention relates to a procedure for playing a 'Live-Casino' game of chance, using one or several complete game decks of shuffled playing cards, whereby a complete game deck shall consist of 1, 2, 3 or 4 suits of playing cards; at the same time, the 4, 5, 6, 7, 8, 9, 10, 11, 12 or 13 playing cards of a complete suit shall be differentiated from each other in one playing card characteristic of a particular group of characteristics of the playing card symbols at least, whereby this group of characteristics shall be the group of characteristics of the playing card symbols in the case of 4, 5, 6, 7, 8, 9, 10, 11, 12 or 13 playing cards or the group of characteristics of the playing card suit symbols in the case of 4 playing cards; the complete suits of a game deck shall respectively demonstrate playing cards that are identical in relation to the different playing card characteristics of the group of characteristics of the playing card symbols or the group of characteristics of the playing card suit symbols.
