(54) Title: INFORMATION STORAGE MEDIUM AND INFORMATION STORAGE MEDIUM PROCESSING APPARATUS

(57) Abstract: An information storage medium according to this embodiment includes a first communication unit configured to communicate with an information storage medium processing apparatus in a contact state, a second communication unit configured to communicate with the information storage medium processing apparatus in a non-contact state, a storage unit configured to store information, and an execution unit configured to execute predetermined processing based on the information stored in the storage unit using information processing results of both the first communication unit and the second communication unit. The execution unit executes the predetermined processing under a condition that both the first communication unit and the second communication unit have succeeded in authentication processing for the predetermined processing.
