(54) Title: TRANSFORMATION AND CONSTRUCTION METHOD FOR CREATING A TROPICAL STYLE SWIMMING LAGOON AT THE INFIELD OF RACING AND/OR ACTIVITY CIRCUITS

FIG. 2

(57) Abstract: A venue transformation and construction method is disclosed that creates a tropical style swimming lagoon at an infield site of a race or activity circuit facility, the infield site being contained within a race or activity circuit perimeter. The transformation includes demolishing at least part of the infield site; excavating material from an area within the infield site; and forming a basin for a large water body having a surface area of at least 3,000 m². Water containment walls are constructed on a first section and a sloped access area is formed on a second section of the basin for a beach. A barrier is included to control access to the beach. At least one additional recreational facility is constructed around the basin and a connection is provided that connects the outfield of the race or activity circuit with the infield site to allow transit of vehicles and/or people.
