(54) Title: RECLOSEABLE STORAGE BAG WITH POROUS EVACUATION PORTAL

(57) Abstract: A recloseable storage bag (20) is disclosed which may include first (22) and second (24) sides having closed sides and an open top. Primary closure members (42a, 42b) may be provided proximate the top, with a secondary closure element (52) being provided in one of the sides to enable gas to be evacuated from the bag (20) after the primary closure members (42a, 42b) are closed. The secondary closure (52) member may further include the ability to prevent liquid from exiting the bag therethrough.
