(54) Title: COMPUTER SYSTEM FOR DATA MANAGEMENT AND METHOD FOR OPERATING SAID SYSTEM

(57) Abstract

The invention relates to a computer system for data management including at least the management of data relating to the trading of warrants (citi CATS-OS), comprising a data processing system (1), an input unit (2), a display unit (3) and a data input (5), wherein the display unit (3) displays a first mask having a format allowing the input of a request for specific data by the input unit (2), the data input (5) is read if the request is input by the input unit (2), the display unit (3) displays a second mask including the requested data, and the data processing system (1) holds the requested data for a predetermined time period T_{set} and performs a transaction relating to the specific data, if a transaction request is input by the input unit (2) during a predetermined time period T_{set}.
