PAPER SHEETS FEEDING APPARATUS

ABSTRACT OF THE DISCLOSURE

The invention provides a paper sheets feeding apparatus which can prevent a breakage of the paper sheets, and a device breakage due to a mixing of a foreign material, in a paper sheets feed. A pressing plate presses the paper sheets input to a money input and output port in a thickness direction, a pick roller separates the pressed paper sheets so as to feed, a foreign material detecting sensor detects whether or not a normal feed is carried out, and a control portion controls a feed carrier of the paper sheets in the case that a normal feed is not carried out, and a feed carrier of the paper sheets in the case that the normal feed is carried out, on the basis of a result of detection.
