(54) Title: PRN ADAPTER

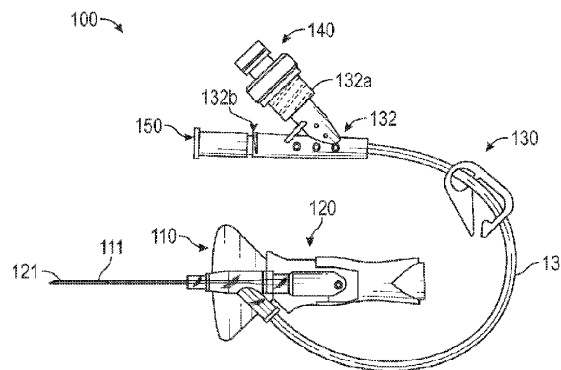

FIG. 1
(Prior Art)

(57) Abstract: A PRN adapter can be formed of a casing and an elastomeric member. The elastomeric member can form a septum and a male luer taper. By forming the PRN adapter of only two components, the manufacturing process can be simplified. The casing may form a hollow interior having a proximal opening and a distal opening. The septum of the elastomeric member may be positioned at the proximal opening of the hollow interior, and the male luer taper may extend to the distal opening of the hollow interior.
