

ABSTRACT

FAR INFRARED RAYS SAUNA BATH APPARATUS

A far infrared rays sauna bath apparatus includes a bath housing (3) having left and right side walls (31), and left and right infrared ray-generating members (5) disposed in the bath housing (3) and mounted respectively on the left and right side walls (31). One of the left and right infrared ray-generating members (5) is disposed at a level below the other of the left and right infrared ray-generating members (5).

Fig. 2 is suggested for publication.
