(54) Title: FOOD CAPSULE WITH MULTIPLE COMPARTMENTS

Fig. 5A

(57) Abstract: The present invention concerns a food capsule (100, 300) comprising a cup-shaped capsule body (101, 301) enclosing a cavity (102, 302) with an opening (105, 305) at a first end (103, 303), a second end (104, 304) comprising at least one outlet (106a, 106b, 310, 311) communicating with said cavity (102, 302); an injection wall (112, 314) closing said opening (105, 305); and at least one partition (107, 306) within said cavity (102, 302) extending from said injection wall (112, 314) to said second end (104, 304) of said capsule body (101, 301) and dividing said cavity (102, 302) into a plurality of chambers (108, 109, 308, 309); characterized in that each chamber houses a quantity of an alimentary substance (110, 111, 315, 316) and communicates with at least one outlet comprising an independently-operable closure means (106a, 106b, 310, 311) in said second end (104, 304).
