

EXTERIOR MATERIAL AND MANUFACTURING METHOD FOR SAME

ABSTRACT

An exterior material according to the present invention has a decorative surface that appears on an outer surface of a building, wherein the decorative surface is provided with a first pattern 4 represented by linear irregularities and a second pattern 5 represented by linear coated films, and wherein the first and second patterns 4, 5 are provided so as to be asynchronous with each other. The decorative surface may be further provided with a third pattern having a color tone different from that of the second pattern 5 so as to be asynchronous with at least one of the first and second patterns 4, 5.
