

FORMWORK ELEMENT PROVIDED WITH SACRIFICIAL SECTIONS**ABSTRACT**

5

The invention relates to a formwork element (10) for a molded wall panel end, comprising:

10 a sole plate (12) having a first lateral edge (14), a second lateral edge (16), an outer face (18), an inner face (20) bearing a caisson (22), said caisson (22) leaving free, on the inner face (20) of the sole plate (12), a first lateral zone (30), defined between the first lateral edge (14) and the caisson (22), and a second lateral zone (32), defined between the second lateral edge (16) and the caisson (22);

15 a form stripping assistance device (40) cooperating with the sole plate (12);

The form stripping assistance device includes at least one first sacrificial section (42) comprising a first portion disposed on the first lateral zone of the inner face of the sole plate.
