

INFORMATION DISPLAY METHOD, TERMINAL, AND SERVER

ABSTRACT

Embodiments of the present invention provide an information display method,
5 terminal, and server, where the method includes: obtaining, by a terminal, content
information of at least one content source, where the at least one content source
corresponds to at least two pieces of account information stored in the terminal;
integrating, by the terminal, the content information into content display information;
and displaying, by the terminal, the content display information. According to the
10 embodiments of the present invention, content information of a content source is
obtained, integrated, and then displayed to a user by classification, so that it is concise
and intuitive for the user to query information without cumbersomeness.
