(54) **Title**: TREATMENT OF CANCER/INHIBITION OF METASTASIS

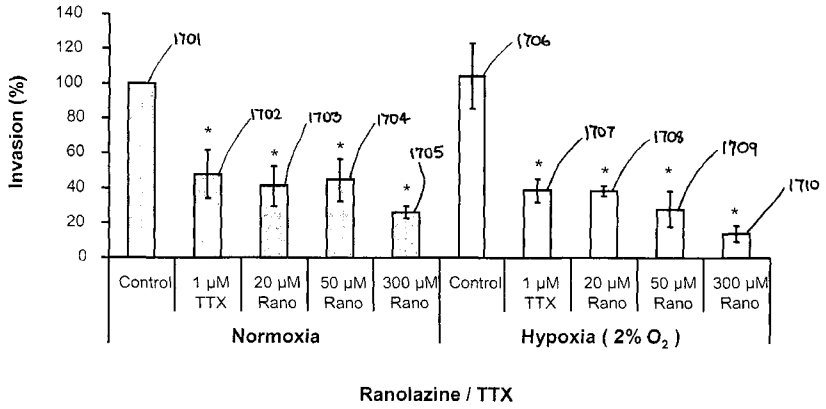

Figure 17

(57) **Abstract**: Substances and methods are disclosed for reducing or preventing metastatic behaviour in VGSC expressing cancer by the effect of at least reducing the persistent part of the voltage gated sodium channel current without eliminating the transient part. Inhibition of metastatic cell behaviours such as detachability, lateral motility, transverse migration and invasiveness is demonstrated using the known drugs ranolazine and riluzole.
