(54) Title: VIRTUAL OBJECT CONTROL METHOD AND APPARATUS, AND TERMINAL, STORAGE MEDIUM AND PROGRAM PRODUCT

(54) 发明名称: 虚拟对象的控制方法、装置、终端、存储介质及程序产品

图 3

- 301 Display a first virtual object located in a virtual environment
302 In response to a moving operation on the first virtual object, display candidate object identifiers corresponding to candidate virtual objects in the virtual environment, wherein the candidate virtual objects are located in an orientation area of the first virtual object
303 In response to a trigger operation on a target object identifier among the candidate object identifiers, control the first virtual object to automatically follow a target virtual object in the virtual environment, wherein the target virtual object is a virtual object that corresponds to the target object identifier

(57) Abstract: A virtual object control method and apparatus, and a terminal, a storage medium and a program product, which belong to the technical field of human-computer interaction. The method comprises: displaying a first virtual object located in a virtual environment (301); in response to a moving operation on the first virtual object, displaying candidate object identifiers corresponding to candidate virtual objects in the virtual environment (302); and in response to a trigger operation on a target object identifier among the candidate object identifiers, controlling the first virtual object to automatically follow a target virtual object in the virtual environment (303). By using the method, the apparatus, the terminal, the storage medium and the program product, the simplification of user operations is facilitated, and a candidate virtual object can better meet operation requirements of a user.

本国际公布:

— 包括国际检索报告 (条约第21条(3))。

(57) 摘要: 一种虚拟对象的控制方法、装置、终端、存储介质及程序产品, 属于人机交互技术领域。
该方法包括: 显示位于虚拟环境中的第一虚拟对象(301); 响应于对第一虚拟对象的移动操作, 显示对
应于虚拟环境中候选虚拟对象的候选对象标识(302); 响应于对候选对象标识中目标对象标识的触发操
作, 控制第一虚拟对象在虚拟环境中自动跟随目标虚拟对象(303)。采用上述方法、装置、终端、存储
介质及程序产品有助于简化用户操作, 使候选虚拟对象更加符合用户的操作需求。
