(54) Title: TOP GRIPPING ARTICLE CARRIER

(57) Abstract

An article carrier (10) for holding together a plurality of articles such as bottles (B1, B2). The carrier comprises opposed upper and lower walls (18, 22, 24) interconnected by spaced side walls (16, 20). Each of the upper and lower walls has a plurality of article receiving apertures (A). The apertures in the lower wall are in register with the apertures in the upper wall. The carrier has a billboard panel (14) depending from one of the side walls (16) and an internal partition structure(s) interconnecting the upper and lower walls. The partition structure is formed from material interposed between two adjacent wall-forming portions (22, 24) of said lower wall. The partition structure comprises a pair of mutually hinged panel elements (S1, S3) disposed in face to face contacting relationship to provide an upstanding part of the partition structure when the carrier is in a set-up condition.
