(54) **Title:** INPUT DEVICE

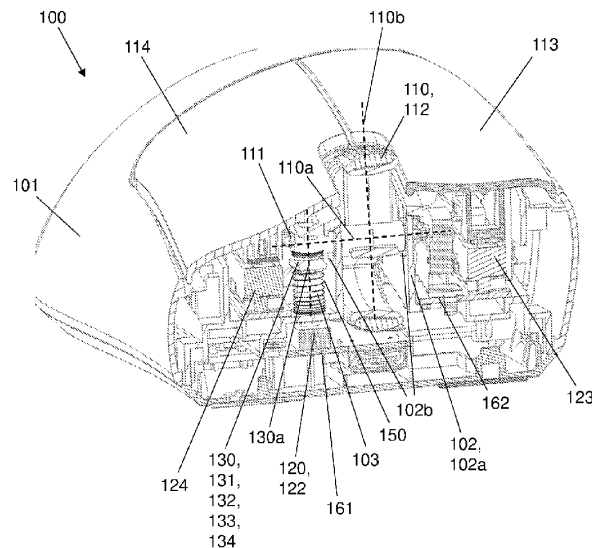

FIG. 1A

(57) **Abstract:** There may be provided an input device. The input device may include a housing and a scroll wheel mounted to the housing in a manner which exposes a part of the scroll wheel for user access. The scroll wheel may include an axle portion that extends along the rotational axis from the center of the scroll wheel. The input device may further include a plunger disposed within the housing between the axle portion of the scroll wheel and a switch of the scroll wheel, the plunger being movable along its longitudinal axis relative to the switch. The plunger may include an axle-engagement portion at a first longitudinal end to engage the axle portion of the scroll wheel and a switch-engagement surface at a second longitudinal end, opposite the first longitudinal end, for actuating the switch.
