Box III TEXT OF THE ABSTRACT (Continuation of item 5 of the first sheet)

A combined sliding and pivot window having sashes (30) pivotally mounted in c shaped sash support frames (20) slidably fixed on rail (40) provided on an outer frame (60). Combined sliding and locking mechanisms allow the sash support frames (20) to slide on rail (40) when the sashes (30) are pivotally closed, or to be locked on the rail (40) when the sashes (30) are pivotally opened, or to be pushed to one side in the outer window frame (60) while allowing all the sashes (30) to be pivotally opened. Pivot mechanisms (32) allow the sashes (30) to be pivotally opened and stay in a desired position and elastic two end locking mechanisms (70) lock the sashes (30) to the sash support frames (20).
