

SELF-SEALING LIQUID CONTAINMENT SYSTEM AND METHOD OF INSTALLING SAME

Abstract

A system. The system includes one or more self-sealing panels and a cap member. The one or more self-sealing panels substantially cover an exterior surface of a liquid container. The cap member covers at least one of the following: one or more portions of the exterior surface of the liquid container; and an exterior surface of at least one of the one or more self-sealing panels.
