(54) Title: STORAGE SYSTEM FOR A HEARING AID

Fig. 1

(57) Abstract: The invention relates to a storage system for storing a hearing aid. The system comprises means for providing power (101), a storage space (102) for containing a hearing aid, output means, communication means through which data from the hearing aid is received wirelessly and a processing unit for processing data received from the hearing aid. The output means is capable of providing functioning and guiding information (104) concerning the functioning of the hearing aid and for guiding the user through positioning of the hearing aid, respectively. The invention further comprises a hearing aid, a kit and a method of testing a hearing aid.
