ABSTRACT

SYSTEM, DEVICE AND METHOD FOR MOBILIZING A RESUSCITATION TEAM.

The present invention relates to a system, device and method for mobilizing a resuscitation team. The system of the present invention comprises a control station 50 and a plurality of responder mobilization devices 30. Each responder mobilization device 30 comprises a communications unit 32 and a mobilization activation means 34. During a resuscitation event, the user actuates the mobilization activation means 34 to mobilize of a resuscitation team. In response to the actuation of the mobilization activation means 34, the communications unit 32 contacts the control station 50 to mobilize the resuscitation team. The method of the present invention comprises the steps of detecting a mobilization activation event within the responder mobilization device 30, and contacting a control station 50 in response to the mobilization activation event. The step of detecting the mobilization activation event includes detecting the actuation of the mobilization activation means 34 of the responder mobilization device 30.
