(54) **Title:** ACCESS POINTS, RADIO COMMUNICATION DEVICES, METHODS FOR CONTROLLING AN ACCESS POINT, AND METHOD FOR CONTROLLING A RADIO COMMUNICATION DEVICE

FIG 10

(57) **Abstract:** According to various embodiments, an access point may be provided. The access point may include: a transmitter configured to transmit restricted access window parameters. The restricted access window parameters may include at least one parameter selected from a list of parameters consisting of: a type parameter indicating which type of restricted access window parameters is represented by the restricted access window parameters; a same group indicator parameter indicating whether a group field is present; and a channel indication presence parameter indicating whether a channel indication is present.
