

ABSTRACT  
MANAGEMENT SYSTEM

A management system (600) for game tokens(1) includes a player identification device (601) installed at a predetermined location in a casino facility to identify a player and thereby identify that the player is at the predetermined location, a database (603) storing information on holders of game tokens (1), and a management device (602) referring to the database (603) to determine whether there is an anomaly in the holder information, wherein the management device (602) determines whether or not there is an abnormality in the combination of the predetermined location where the player identified by the player identification device (601) is located and the holder information stored in the database (603).
