ABSTRACT

SYNERGISTIC COMPOSITION WITH ANTI-PROLIFERATIVE ACTIVITY

The present invention provides a synergistic composition that exhibits an anti-proliferative activity, the composition including: therapeutically effective amount of Turmeric (*Curcuma* spp.); and therapeutically effective amount of Cow urine (Gomutra). The composition comprising a combination of Cow urine and Turmeric extract exhibits unexpected synergistic effect and significantly reduce and/or control the proliferation of cancer cells as compared to Cow urine and Turmeric when used alone.
