

COATING FILM REMOVING DEVICE AND COATING FILM REMOVING METHOD

ABSTRACT

5 Provided are a coating film removing device and a coating
film removing method capable of efficiently removing a coating
film without applying high tension to a coated film. The
conveyance coating film removing device of the present
invention removes a coating film from a coated film including
10 the coating film on at least one surface of a base film, the
coating film removing device including: a conveyance mechanism
that conveys the coated film; and a coating film removing
member having an edge extending in a film width direction, the
edge that being configured to be in contact with a coating
15 film surface of the coated film to remove the coating film, in
which, as viewed from a side in a conveyance direction of the
coated film, an angle formed by a surface on an upstream side
in the film conveyance direction among surfaces forming the
edge of the coating film removing member and the coated film
20 conveyed toward the edge is greater than or equal to 90° and
less than 180° .
