(54) Title: METHODS AND APPARATUSES FOR HARQ-ACK FEEDBACK SKIPPING

FIG. 1

(57) Abstract: Embodiments of the present disclosure relate to methods and apparatuses for HARQ-ACK feedback skipping. A UE may: receive, from a PDCCH monitoring occasion, a DCI format scheduling a second set of serving cells in a first set of serving cells for multi-cell scheduling and indicating a PUCCH transmission occasion for the UE to transmit HARQ-ACK feedback for the DCI format; and determine whether to generate the HARQ-ACK feedback for the DCI format in response to determining that an active DL BWP on a first serving cell of the second set of serving cells is changed after the PDCCH monitoring occasion and before the PUCCH transmission occasion and the DCI format does not trigger the active DL BWP change on the first serving cell.
