

Abstract

A hair cosmetic comprising the following components (A) to (C), wherein content of the component (A) is 0.1 to 10 mass%, and mass ratio of the component (B) to the component (C), (B)/(C), is 0.8 to 99. (A) hair cosmetic polymer for the having solubility or dispersibility in water or ethanol, (B) C₁₋₄ monohydric alcohol, and (C) C₉₋₂₁ liquid oil represented by formula (1) wherein R¹ to R⁸ are each H or a methyl group, X is -CH₂-, -COO-, or -CH₂COO-, n is 1 to 7, m and l are 0 to 2, n+m+l is 1 to 7, and any one of R⁴ to R⁷ is a methyl group when both m and l are 1 or more.
