PAYMENT APPARATUS, CONTROL METHOD, PROGRAM, AND PAYMENT SYSTEM

ABSTRACT

A payment apparatus (2000) includes a discount amount acquisition unit (2040), a determination unit (2060), and a payment unit (2080). The discount amount acquisition unit (2040) acquires a discount amount. The determination unit (2060) determines whether a discount is applied to a purchase price of a product on the basis of a use history of a target card. The payment unit (2080) applies a discount to the purchase price of a product on the basis of the discount amount in a case where the determination unit (2060) determines that a discount is applied, and performs payment by card using the target card.
