

ABSTRACT

**WEAPONS PLATFORM, MILITARY VEHICLE COMPRISING A WEAPONS PLATFORM
AND METHOD FOR OPERATING A WEAPONS PLATFORM**

The invention relates to a weapons platform comprising an undercarriage (11, 111) and a weapon (13, 113) that is positioned in a directable manner on the undercarriage (11, 111). The undercarriage (11, 111) can be supported in relation to the ground beneath by means of a supporting device (16, 116) that is damped in order to absorb firing recoil forces, the damping characteristics of the supporting device (16, 116) being adjustable in accordance with the firing recoil forces that are to be expected from the weapon (13, 113). The invention also relates to a military vehicle (1) comprising a weapons platform (10, 110) of this type. The invention further relates to a method for operating such a weapons platform (10, 110).
