

Abstract

5 An outdoor drying rack including: support, activities suspension device,
traction device and removable cover. The support includes support rods, brackets,
fixed strip, activation bar, sleeve, and coupling. The activities suspension device
includes roller units, rods, joint pieces, metal chain. The traction device includes
10 pulley unit, drag rope, eye bolt, sleeve, lantern ring. The removable cover includes
circular tubes, tarpaulin, batten, butt hinges, and angle sheet. The support is set
with bracket, coupling, activation bar and sleeve, so as to install and unload the
support conveniently. The setting of the suspension device and traction device
makes the rods move as is needed, so it is convenient to hang and collect clothes.
Many slot positions of the bracket; circular tube and butt hinge which are
equipped on the removable cover make the cover open and shut conveniently.
