

Abstract**Method for generating and inputting mnemonic devices
and article for registering the input arrangement**

A method for inputting a mnemonic device on a numeric keypad wherein the spatial arrangement of the input is recorded. The invention provides for a method for generating a mnemonic device from a list of keywords to be memorised and inputting said generated mnemonic device on a numeric keypad wherein the spatial arrangement of the input is recorded.

The spatial arrangement of the input is registered on an input record means which may be embodied as a sheet provided with the keypad layout upon which the spatial arrangement in which the sequence of keys being pressed in respect of the mnemonic device being inputted may be performed with the user's finger. The input record is provided in the form of a computer-implemented storage, which is retrievable.
