(54) Title: GENERATING GROUND TRUTH FOR MACHINE LEARNING FROM TIME SERIES ELEMENTS

FIG. 2

(57) Abstract: Sensor data, including a group of time series elements, is received. A training data set is determined, including by determining for at least a selected time series element in the group of time series elements a corresponding ground truth. The corresponding ground truth is based on a plurality of time series elements in the group of time series elements. A processor is used to train a machine learning model using the training dataset.
