(54) Title: ROULETTE VISUAL DISPLAY FOR GAMING SYSTEMS

(57) Abstract: A roulette wheel system and method of using are disclosed. A roulette wheel may include a transparent rim and an optical display system positioned beneath the transparent rim. The optical display system may be configured to provide a plurality of lighting effects visible through the transparent rim. A controller may provide signal content to the optical display system, producing a lighting effect corresponding to current gameplay information. Lighting effects may indicate simulating rotation of numbers or symbols, real-time game information, track a position of a roulette ball, respond to various gaming events, or promote interest and excitement towards the game.
