

# **METHOD AND ARCHITECTURE FOR ACCESSING AN INTERNET PROTOCOL MULTIMEDIA SUBSYSTEM (IMS) OVER A WIRELESS LOCAL AREA NETWORK (WLAN)**

## **ABSTRACT**

A method and architecture for accessing an IMS (121) over WLANs/WWANs generally, and more particularly over WLANs/WWANs viewed in light of existing related standards is disclosed. More specifically, the invention provides new interfaces enabling IMS (121) access over WLANs/WWANs and an exemplary method and architecture for such an interface.
